PhD candidate working on multimodal representation learning for 3D medical imaging. My research focuses on report generation, abnormality classification, and clinically grounded multimodal learning in 3D Computed Tomography. I have authored first-author publications in venues such as ISBI, MIDL and MICCAI, as well as journals such as MELBA.

EDUCATION

INSA Lyon, University of Lyon

- PhD student in Machine Learning for Medical Imaging.

Lyon, France

2024-Present

Ecole Normale Supérieure Paris-Saclay

- Master of Science (MSc) in Artificial Intelligence - MVA (Mathematics, Vision, Learning)

Paris, France

2022-2023

INSA Rennes

- Master of Science (MSc) in Applied Mathematics - Engineering degree

Rennes, France

2017-2022

Instituto Superior Técnico Lisboa

- Master of Science (MSc) in Applied Mathematics - International Exchange Program

Lisbon, Portugal

2021-2022

RESEARCH INTERESTS

- Representation learning for 3D medical imaging (MIDL 2025; MICCAI Workshop 2025; MELBA 2026).
- Multimodal learning for automated report generation (ISBI 2025; MICCAI 2026).
- Vision-language models for radiology.

PROFESSIONAL EXPERIENCE

PhD Candidate - INSA Lyon, Hospices Civil de Lyon, Philips.

- Multimodal representation learning for 3D Computed Tomography understanding.
 - Advisors: Prof. Loïc Bousset, Olivier Nempont and Carole Lazarus.
 - Published first-author papers at ISBI, MIDL, MICCAI and MELBA.

Lyon, France

2024 - 2027

AI/ML Research Intern - Thales, ENS Paris-Saclay.

- Developed deep learning and computer vision methods for UAV localization.
 - Advisors: Prof. Gabriele Facciolo, Prof. Enric Meinhardt-Llopis, Benedicte Bascle and Corentin Abgrall.
 - Published a first-author paper at IGARSS.

Paris, France

2023

AI/ML Research Intern - Centre Leon Berard.

- Evaluated oncology survival prediction models under cross-institutional distribution shifts.
 - Advisor: Dr. Loïc Verlingue.

Lyon, France

2022

Data Scientist Intern - Hupi.

- Developed predictive machine learning models for industrial maintenance and healthcare risk forecasting.
 - Advisor: Ivan Le Bihan.

Bidart, France

2021

PUBLICATIONS

Conference

- UniCT: A Unified Joint Multi-Task Framework for 3D Chest CT Abnormality Analysis. [MICCAI 2026](#) - **Early accept.** [T. Di Piazza](#), C. Lazarus. O. Nempont, L. Bousset.
- Imitating Radiological Scrolling: A Global-Local Attention Model for 3D CT Volumes Abnormality Classification. [\[PDF\]](#) [MIDL 2025](#) - **Oral presentation.** [T. Di Piazza](#), C. Lazarus. O. Nempont, L. Bousset.
- Automated Abnormality-Guided Report Generation from 3D Chest CT Volumes. [\[PDF\]](#) [ISBI 2025](#) - **Oral presentation.** [T. Di Piazza](#), C. Lazarus. O. Nempont, L. Bousset.
- Leveraging Edge Detection and Neural Networks for better UAV Localization. [\[PDF\]](#) [IGARSS 2024](#) - **Oral presentation.** [T. Di Piazza](#), G. Facciolo, E. Meinhardt-Llopis, B. Bascle, C. Abgrall, J. Devaux.

Journal

- Structured Spectral Graph Representation Learning for Multi-label Abnormality Analysis from 3D CT Scans. [\[PDF\]](#) [MELBA Journal 2026](#). [T. Di Piazza](#), C. Lazarus. O. Nempont, L. Bousset.

ACADEMIC SERVICE

- Conference reviewer for ISBI (2025), MIDL (2025) and MICCAI (2026).
