EDUCATION

Ecole Normale Supérieure Paris-Saclay

Paris, France

- Master of Science (MSc) - MVA (Mathematics, Vision, Learning) 2022-2023
 - Convex optimization - Deep Learning for signal processing - Reinforcement Learning - Object recognition and Computer Vision - Responsible Machine Learning
 - Machine Learning for Time Series - Graphs for Machine Learning - Advanced Deep Learning - Deep Learning for medical imaging

INSA Rennes

Rennes, France

- Master of Science (MSc) - Applied Mathematics Department - Engineering degree 2017-2022
 - Data: Machine Learning - Supervised / Unsupervised Learning - Regression - Classification - Risk and Scoring - Time Series - Multivariate Analysis - Inferential Statistics
 - Optimization: Operational Research - Branch & Bound/Price
 - Applied Mathematics: Stochastic Dynamical System Model - Markov Chains - Hilbertian Tools - PDE

Instituto Superior Técnico Lisboa

Lisbon, Portugal

- Master of Science (MSc, International Exchange Program) - Applied Mathematics 2021-2022
 - Deep Learning (Natural Language Processing & Computer Vision) - Data Mining - Clustering Methods

PROFESSIONAL EXPERIENCE

INSA Lyon, University of Lyon - in collaboration with Philips and Hospices Civil de Lyon.

Lyon, France

- *PhD Student* 01/2024 - 01/2027
 - Advisors: Prof. Loic Boussel, Olivier Nempont and Carole Lazarus.
 - Representation learning for report generation and multi-label abnormality classification from 3D CT Scans.
 - Publications at ISBI, MIDL and MICCAI.

Thales - in collaboration with Ecole Normale Supérieure Paris-Saclay.

Paris, France

- *AI/ML Research Intern* 04/2023 - 09/2023
 - Advisors: [Prof. Gabriele Facciolo](#), Prof. Enric Meinhardt-Llopis, Benedicte Bascle and Corentin Abgrall.
 - Deep learning and Computer Vision algorithms for vision-based UAV localization.
 - Publication at IGARSS.

Centre Léon Bérard.

Lyon, France

- *AI/ML Research Intern* 03/2022 - 07/2022
 - Advisor: Dr. Loic Verlingue.
 - Development, testing and interpretation of NLP algorithms for monitoring of patients in oncology.

Hupi.

Bidart, France

- *Data Scientist Intern* 05/2021 - 08/2021
 - Development and deployment of a machine failure prediction model for a Spanish industrial group.
 - Analysis of data on the follow-up of dependent persons and prediction of their date of institutionalization.

PUBLICATIONS

- Structured Spectral Graph Representation Learning for Multi-label Abnormality Analysis from 3D CT Scans. [MICCAI Workshop 2025 \(EMERGE\)](#), Oral. [MELBA Journal Extension under review](#). [\[arxiv\]](#) [\[code\]](#)
- Imitating Radiological Scrolling: A Global-Local Attention Model for 3D Chest CT Volumes Multi-Label Abnormality Classification. [MIDL 2025](#), Oral. [\[arxiv\]](#) [\[code\]](#)
- Automated Abnormality-Guided Report Generation from 3D Chest CT Volumes. [ISBI 2025](#), Oral. [\[arxiv\]](#) [\[code\]](#)
- Leveraging Edge Detection and Neural Networks for better UAV Localization. [IGARSS 2024](#), Oral. [\[arxiv\]](#) [\[code\]](#)

ACADEMIC SERVICE

- Conference Reviewer for ISBI (2025), MIDL (2025) and MICCAI (2026).
